

Professional Demo Kits

These are our “Standard” Demonstration Test Kits. You can customize your own kit to fit your particular testing needs and other preferences. For example: You can select the aluminum case or a more durable thermoformed plastic case. You can select the regular one-chamber mini-softener with carbon and resin or a dual-chamber mini-softener with the resin and carbon in a separate chamber.

Please call us to help us build a kit customized for you 630-540-2113

PW-2050	Platinum Demo case
