

Private Label Test Kits & Reagents for the Water Treatment Industry

Our test kits will help you outsell your competition – If you don't outsell your competition, we will take our kits back.

- Our line of new OrganoPhosphonate kits reduces testing time, decreases procedural steps, increases sharpness of endpoint.
- Our latest OrganoPhosphonates Colorimeter kit can test down to 1.5 ppm of OrganoPhosphonate. You can now eliminate the need for expensive molybdate tracers.
- Our line of new Polymer tests allows you to test for polymers directly without relying on expensive and semi-reliable tracers.
- We now have powder pillows to replace Hach pillows used in colorimeter tests.

We specialize in Private Label Test Kits/Reagents.

- Private labeling increases your name retention. Customers see your name every time they use your kits. They'll call you instead of your competition when they need something.
- Private labeling increases sales and profits of your main product lines.

Other services we offer.

- no minimum order
- private label MSDS
- 20%-50% lower in prices than the largest competitors
- blind and drop shipment to your customers
- analytical services – water and wastewater testing, deposit analysis, microbial screening, corrosion evaluation
- custom kit for special applications
- contract packaging

Test Kits and Replacement Reagents

- OrganoPhosphonate
- Polymer
- Powder Pillows
- Bio-Displides
- Hardness
- Nitrite
- Sulfite
- Many More
